#### Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

#### Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

| Section                              | Content                                                                                                                                                       |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Customer Segment(s)</b>        | • College Students • Class Teachers • Head of Department (HOD)                                                                                                |
| <b>2. Jobs-to-be-done / Problems</b> | • Apply for leave quickly • Get timely approval • Track leave status • Reduce paperwork • Enable efficient faculty approval                                   |
| <b>3. Triggers</b>                   | • Student needs leave due to illness, family emergency, or personal reasons • Upcoming exams or attendance concerns • Faculty receives a new leave request    |
| <b>4. Emotions (Before / After)</b>  | <b>Before:</b> Frustrated, uncertain, anxious about attendance. <b>After:</b> Confident, informed, satisfied, stress-free.                                    |
| <b>5. Available Solutions</b>        | • Paper leave forms • WhatsApp messages • Emails • Verbal requests through Class Representatives • Manual approval process                                    |
| <b>6. Customer Constraints</b>       | • No centralized tracking • Delayed approvals • Limited communication • Students unaware of request status • Faculty managing requests from multiple channels |
| <b>7. Behaviour</b>                  | • Students contact teachers via WhatsApp or email • Follow up repeatedly • Faculty reviews requests manually • Students wait for responses or reminders       |

| Section                         | Content                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8. Channels of Behaviour</b> | <b>Online:</b> College portal, ServiceNow application, Email. <b>Offline:</b> Direct interaction with Class Teacher, HOD, or Class Representative.                                                                                                                                                                                                                                                                                                                      |
| <b>9. Problem Root Cause</b>    | The college lacks a centralized leave management workflow. Leave requests are processed manually through different communication channels, resulting in delays, poor visibility, and inconsistent tracking.                                                                                                                                                                                                                                                             |
| <b>10. Your Solution</b>        | Develop a <b>ServiceNow Student Leave Automation System</b> where students submit leave requests online. Requests are routed to the Class Teacher, who can approve, reject, or manually escalate requests exceeding five days to the HOD. HOD can approve, reject, or modify approved leave days. Flow Designer automatically sends email notifications whenever the leave status changes, and students can track the status of their requests through the application. |
